Houston Hosts Smart City Tech Conference

Greater Houston Partnership, the City of Houston and TechStreet Houston Team Up to Host Inaugural Technology Conference

HOUSTON (November 19, 2013) – The City of Houston has teamed up with TechStreet Houston to offer a full-day conference with onsite workshops, tech expos and a Mayor Roundtable. It is a non-traditional meetup on steroids with over 2,000 attendees expected.

TechStreet Houston takes place Wednesday, November 20, 2013 at the George R. Brown Convention Center in the heart of downtown Houston, Texas. Innovators, developers, and tech leaders are coming together to learn, share, showcase and promote their creative ideas, expertise, and technologies.

Houston is the fourth largest and second fastest-growing metro area (*Forbes*) in the United States and is ideally positioned for expansion and innovation. Software developers, venture capitalists and accelerators are finding Houston to be a great place for work and play

“The Greater Houston Partnership is proud to be a sponsor of Total Energy USA and Tech Street Houston, two innovative conferences that have combined forces to present a platform to cultivate smarter citizens, communities and businesses, said Greater Houston Partnership President & CEO Bob Harvey. “Houston is fast becoming a true hot bed of innovation and technological breakthroughs, especially in energy, life sciences and healthcare. These breakthroughs will attract jobs, investment and talent to our region now and into the future.”

The conference is free of charge and open to the general public. To learn more visit www.techstreethouston.com.
